For over a half century, Danner Manufacturing has been devoted to developing and refining the process of efficiently moving and filtering water for a variety of applications. Our innovative technologies have become well known by consumers and professionals alike in the areas of aquariums, ponds and water gardens, pools and the emerging hydroponic industry. Through our family of distinct brands – Pondmaster®, ProLine™, Supreme™, Cover-Care™ and Mainstream™ - we have gathered a legion of dedicated customers who appreciate and rely on the effort and support they receive to help them make their businesses trouble-free and more successful.

In addition to improving pump quality and reliability, we have also developed an impressive array of ancillary products for cleaning, filtering and distributing water. See our skimmers, low pressure filtering systems, fountain displays, pump vaults and UV systems to understand our drive for totally integrated and compatible products.

We are continually working on additions and improvements to help the professional do better, faster and more reliable installations. If you are looking for a product and do not see it here, contact us today and we’ll let you know where it is in our development schedule.

Magnetically Driven Utility Pumps

Magnetic drive pumps are made to run continuously, without seals to wear out. Highly energy efficient, the savings pass on to the consumer. Being filled with epoxy, not oil, they cannot leak oil into the pond. All Pondmaster pumps are suitable for statuary, fountains, ponds, and/or aquariums.

Supreme® Classic General Purpose Utility Pumps have been designed to handle virtually any application where water has to be moved. They have been fulfilling the needs of professionals and hobbyists for over 10 years with efficient, quiet, and reliable 24/7 performance. Classic pumps are ideal in either saltwater or freshwater environments and operate equally well inline or submerged. With only one moving part, a ceramic impeller, and an epoxy-encased power unit, there's never a fear that it will contaminate the water with harmful oils or chemicals.

Available in pumping capacities from 250 to 2400 GPH. Ask your dealer which Supreme Classic General Purpose Utility Pump is best for your application.

**Pondmaster Ultraviolet Clarifiers**

The only Ultraviolet Clarifiers with UL listed submersible ballasts, all three feature the glowing monitor Halo Ring that shows the light is working, above or below water. The black color makes it unobtrusive wherever it’s used. Visible during the day and night from any angle, the soft blue halo shows it’s working, but does not detract from the beauty of your pond. Designed to handle the clarifying needs of ponds up to 6,000 gallons. These lights offer great value, along with ease of use unsurpassed by any other ultraviolet sterilizer. Look for these submersible lights - they’re what every pond needs.

So good it’s got a halo around it

**MERCHANDISE DISPLAYS**

**Designed for Every Need – From 3’ to 12’**

No matter how large or small your Pond and Water Garden business, there is a Pondmaster® Plan-o-gram that will show your customers that you have what they need. We offer nine different programs – seven of them are standard gondola merchandisers, two are new rolling displays that can be positioned indoors or outdoors and rolled inside after hours for protection and security.

The merchandise offered in each of the programs has been carefully structured to give you the best of the best, in the right proportions so that you will maximize the return on your investment.

Contact your dealer for a copy of our newest Merchandise Display catalog. It contains all the information on our pre-selected displays from 3’ to 12’. These powerful merchandisers will add big dollars to your sales – and your bottom line.
